

AMSONIA GRANDIFLORA LARGE-FLOWERED BLUE STAR

This deciduous perennial is from southern Arizona, found along canyons at elevations of 3900 to 4500 feet. During the winter months it will die back to a long-lived woody stem. The long stalks may be cut back at this time. Clusters of tiny five-petaled, white flowers tinged with lavender are produced from March through May. The leaves are variable from lance-shaped to threadlike. It will perform well in full sun or afternoon shade and is drought tolerant once established. Hardy to -10° F. USDA Zone 6.

AT A GLANCE SUMMARY	
SIZE (H X W)	3 feet x 3 feet
FLOWER COLOR	White
FLOWER SEASON	Spring - Summer
EXPOSURE	Full Sun to Part Shade
WATER	Low to Moderate
GROWTH RATE	Moderate
HARDINESS	-10° F, USDA Zone 6
PRUNING	After Frost
