

**TECOMA HYBRID P.P. 20246  
SIERRA APRICOT®**

This petite Esperanza delivers a powerful punch of apricot color in the summer months. This perennial is smaller than previous selections, with a compact and dense form. Because it is seedless, this clone blooms continuously throughout the summer months with large clusters of bell-shaped flowers. Hummingbirds love the tubular blossoms. In mild climates Sierra Apricot® remains mostly evergreen, but is deciduous below temperatures of 25°F. Simply cut the stems back after frost, and plants will flush out quickly in the late spring. Our thanks go to good friend and plant breeder James Spivey for sharing this clone with us!

<b>AT A GLANCE SUMMARY</b>	
SIZE (H X W)	3 feet x 4-5 feet
FLOWER COLOR	Apricot
FLOWER SEASON	Spring - Fall
EXPOSURE	Full Sun
WATER	Low to Moderate
GROWTH RATE	Rapid
HARDINESS	15° F, USDA Zone 8
PRUNING	Prune hard after frost
