

Hesperaloe campanulata 'MSWNNuevo Leon' Lionheart® P.P.#32069

Lionheart® is a selection of *Hesperaloe campanulata* that was chosen from our breeding program for its sturdy, upright flower spike to 10 feet and extended flower show. Blooms will begin mid-spring as with most other Hesperaloes, but can last all summer long even in the hottest climates. Individual blossoms have deep pink buds that open up to a nice iridescent white center. The leaves are very similar to that of *Hesperaloe funifera*, but smaller in scale and not so coarse. However it is a smaller species, growing to only 3 to 4 feet tall and wide. Plant Lionheart® in full sun and well drained soil. Plants will also tolerate reflected heat or partial shade. Native to Nuevo Leon, Mexico, this plant is hardy to at least 0 ° F. This plant requires very little maintenance.

AT A GLANCE SUMMARY

SIZE (H X W)	3-4 feet x 3-4 feet
FLOWER COLOR	Pink with white centers
FLOWER SEASON	Late spring and summer
EXPOSURE	Full sun, reflected heat
WATER	Low
GROWTH RATE	Moderate
HARDINESS	0° F, USDA Zone 7
PRUNING	Remove old flower stalks in late summer
