

EUCALYPTUS SALMONOPHLOIA SALMON GUM

One of the most beautiful features of this tree is its smooth, salmon-colored bark. Salmon gum also has narrow, shiny, bright green leaves which shimmer in the sunlight. Although trees up to 80 feet tall have been reported in Australia, older trees in Phoenix are only 40 feet tall and wide. It is slow-growing, and will be one of the best choices for residential landscapes. The salmon gum is moderately salt-tolerant. In Western Australia, this tree has been a main source of timber and firewood. It is hardy to 20°F. USDA Zone 9.

AT A GLANCE SUMMARY	
SIZE (H X W)	40 feet x 40 feet
FLOWER COLOR	White
FLOWER SEASON	Spring
EXPOSURE	Full Sun
WATER	Low
GROWTH RATE	Slow
HARDINESS	20° F, USDA Zone 9
PRUNING	To Thin & Shape
