Glandularia (Verbena) goodingii
Gooding Verbena

GROUNDCOVER

Native to Arizona, *Glandularia (Verbena) gooddingii* produces gorgeous lavender flowers that compliment many of our yellow-flowering native perennials. In the spring, this plant puts on quite a flower show, but blooming tapers off as the temperatures rise. Goodding Verbena forms a soft mound to 1 foot tall by 3 feet wide. Plants may appear scruffy, or die out completely in the summer. Although this species is short-lived, it readily re-seeds in the garden. Once your population is established, you should have new plants filling in the bare spots each spring. It is visited by many species of butterflies during its bloom season. This species is cold hardy to 0° F.

AT A GLANCE SUMMARY	
SIZE (H X W)	1 foot x 3 feet
FLOWER COLOR	Lavender
FLOWER SEASON	Spring into summer
EXPOSURE	Full to part sun
WATER	Low
GROWTH RATE	Slow to moderate
HARDINESS	0° F, USDA Zone 7
PRUNING	Prune only to remove spent flowers
