

Penstemon wrightii Texas Rose, Wright Penstemon

This species closely resembles Coral Penstemon, although its form is more compact. Texas Rose has tall spikes topping out at 4 feet in height. Its intense orange-pink flowers really stand out in the landscape. Although it is relatively “new” to Arizona’s nursery trade, this Texas and Arizona native was a favorite in Europe before World War I! Make sure to plant in well-drained soil, this selection does best in full sun. Texas Rose is cold hardy to 0° F, USDA Zone 7.

AT A GLANCE SUMMARY	
SIZE (H X W)	1 foot x 1 foot
FLOWER COLOR	Orange-pink
FLOWER SEASON	Spring
EXPOSURE	Full sun
WATER	Low
GROWTH RATE	Fast
HARDINESS	0° F, USDA Zone 7
PRUNING	Remove spent flowers
