

Salix goodingii Gooding Willow

This fast growing, riparian tree is native to much of the Southwest from California to Texas. It has long, narrow, light green leaves to 5 inches long that turn gold in the fall prior to leaf drop. Mature trees will range from 20 to 30 feet in height and equally as wide. It should be planted in full sun and provided ample water. Gooding Willow is commonly used in habitat restoration work. Hardy to 0° F. USDA Zone 7.

AT A GLANCE SUMMARY	
SIZE (H X W)	20-30 feet x 20-30 feet
