

SOPHORA AFFINIS EVE'S NECKLACE

This deciduous multi-trunked shrub or small tree grows in riparian areas from central Oklahoma to Louisiana. The glossy green compound leaves are fine-textured and have a ferny appearance. Pale pink-white wisteria-like flowers with creamy yellow centers are produced in loose racemes during the spring. The bean-like pods are constricted between the seeds to resemble a string of pearls, and it is sometimes called Eve's necklace. Normal height is about 10 to 15 feet by 6 feet across. Plant in full sun to filtered sun and in well-drained soils.

AT A GLANCE SUMMARY	
SIZE (H X W)	10-15 feet x 6 feet
FLOWER COLOR	Pink & Yellow
FLOWER SEASON	Spring
EXPOSURE	Full to Filtered Sun
WATER	Moderate
GROWTH RATE	Slow
HARDINESS	0° F, USDA Zone 7
PRUNING	To Shape
