

Vauquelinia californica v. pauciflora

This variety of the Arizona Rosewood has slightly smaller and thicker leaves, smaller flower clusters and a limited range. The overall size of this Rosewood is also a bit smaller as well. Otherwise the other characteristics are similar to the regular species. This selection is native to southwestern New Mexico, southeastern Arizona and into northern Mexico. Normal size is 14 feet by 8 feet. Hardy to 0° F. USDA Zone 7.
