

Yucca pallida Pale Leaf Yucca

Native to north-central Texas, this trunkless yucca is a good choice for locations where a low-growing form is required. It can eventually form wide clumps with up to 30 heads. Its flexible, pale blue-green leaves measure 1 inch wide by 1 foot long and generally have a twist to them, providing more visual interest. The leaf margins have a light yellow to white stripe and are finely serrated. In late spring it produces flower stalks covered by large, pure white, bell-shaped flowers. Pale leaf Yucca is cold hardy to at least -10°F. USDA Zone 6.

AT A GLANCE SUMMARY	
SIZE (H X W)	1-2 feet x 1-3 feet
FLOWER COLOR	White
FLOWER SEASON	Summer
EXPOSURE	Full sun
WATER	Low
GROWTH RATE	Slow
HARDINESS	-10° F, USDA Zone 6
PRUNING	Remove spent flower stalks
